

Zoo Scavenger Hunt

Travel around the Zoo in search of the answers to the questions below. Have fun adventuring!

Children's Zoo

1. There are a few **ALPACAS** living in Children's Zoo. They are one of the first critters you see as you walk down the path. How many can you find?

1 2 3 4 5 6 7 8 9 10 (Subject to change)

2. Our **RABBITS** are as big as they are cute. A Flemish giant rabbit can reach up to **22** pounds in weight!

3. We have a family of **GOATS & SHEEP** living in and near our Children's Zoo barn. See if you can get a close look at their face—specifically their eyes. You'll notice their eyeballs look different than ours. Humans have circle-shaped pupils (black, center portion of the eye). What shape is a goat's pupil?

Star

Triangle

Diamond

Rectangle

Square

Education & Conservation Center Building

4. "Harriet the Shark" has written a diary and posted it on the wall. Read through her entries and learn about **HAMMERHEAD SHARKS**. What do scientists call a baby shark?

Cub

Pup

Chick

Larva

5. Is a **RED-TAILED BOA** good at swimming? YES NO

6. There are a few **AMPHIBIANS** that call the Education & Conservation Center their home. What are two species can you find?

African Bullfrog and **Amazon Milk Frog**

Africa

7. Are you ready to play a game? Become an **African Lion** in the wild and play the WHEEL OF SURVIVAL! It can be incredibly hard to survive and find food as a predator. ***Spin the wheel*** Circle your outcome: (answers vary)

Keep Hunting Retreat Try Again You Catch and Eat your Prey

Wisconsin Trails & Great Plains

8. Find the **PRAIRIE DOG** and **AMERICAN BADGER** homes. Use the crawl tunnels to see how they are doing. Try it out and get up close to these amazing natural diggers! Circle what you observe: (answers vary)

Prairie dog:  Digging Eating Resting Standing Walking

Badger:  Digging Eating Resting Standing Walking

9. **RED PANDAS** loves to eat the plant: **bamboo**, just like giant pandas!

Northern Trail

10. At the **BURROWING OWL** habitat, there is an outline of their wingspan. Stretch out your arms and compare your “wingspan” to our feathered friends! Are your outstretched arms longer, shorter, or about the same length as a burrowing owl's wings? (answers vary)

Shorter

Longer

About the Same

11. The **COTTON-TOP TAMARIN** is an animal we work to protect as a threatened species. They are listed as *Critically Endangered*. They are found in one small part of the South American rainforest. In which country are they found?

Brazil

Chile

Argentina

Venezuela

Columbia

Great job finishing your adventure. Hopefully you've learned something new and had fun. Come back and say hi our zoo family anytime!
